To our valued customers,

People's Food Co-op management has been informed that a PFC employee has tested positive for Covid-19. This employee last worked on Friday, October 23 and the Health Department determined that the employee was not contagious at that time.

The employee was tested after someone they had been in close contact with outside the Co-op tested positive. The employee immediately informed PFC of the potential exposure as soon as the contact was identified and did not work and was not in the store since they were informed of potential exposure.

Immediately upon learning the employee had received a positive test we notified the Washtenaw County Health Department. We have worked cooperatively with them, providing all required information. The Health Department determined that the employee was not at PFC during their contagious period and therefore contact tracing, notification or quarantine is not needed for any PFC staff or customers.

Public Safety

The Health Department is not requiring PFC to take any additional action in this situation, but we did want to inform our customers.

The Health Department and PFC are confident in PFC's already increased sanitizing, cleaning, employee health screening, social distancing, and face mask protocols to ensure the safety of our staff and the public.

Staff Safety

We hope you already know that the safety and respect of our staff is of utmost importance to us. Upon learning of the positive result we immediately informed all staff and are committed to supporting our team member who tested positive through their recovery.

We work our hardest to be your Safe Store, but we knew a positive case was likely to occur at some point during this pandemic. We are proud that the efforts we have kept in place has kept the impact contained and we will continue to do everything in our power to keep staff and customers safe whenever they are at PFC.

Please do not hesitate to reach out to me personally if you have any specific concerns or questions. Our state and local Health Departments are also a great resources for information.

Sincerely,

Angie Voiles
People's Food Co-op General Manager
